## APPENDIX 4: Northumberland Sites and Monuments Record (SMR)

---

The following contains details of archaeological sites, monuments, and listed buildings in Ingram township listed in the Northumberland County Council Sites and Monuments Record. Catalogue numbers relate to site distribution plans reproduced in this volume.

<b>Catalogue No.</b> 1	<b>SMR No.</b> 1252	<b>Period</b> IRON AGE
<b>Site Name</b> Axe, iron implement and whetstone	<b>Listing/scheduling</b> None	<b>Type</b> Various
<b>Description</b> The following implements were found together by a shepherd in a peat rift in a 'hag', a quarter of a mile on the west side of Caldlaw Hope, and near Comb Fell:- 1. A bronze socketed axe. 2. An early Iron Age iron implement of uncertain character, decomposed by moisture. 3. A whetstone.		
<b>Catalogue No.</b> 2, 3	<b>SMR No.</b> 1254	<b>Period</b> ROMAN
<b>Site Name</b> Greaves Ash Camp	<b>Listing/scheduling</b> Scheduled Monument	<b>Type</b> Fortified Settlement
<b>Description</b> At NT 9675 1655 is a complex of 13 hut-circles (g) all levelled into the slope and surrounded by enclosing walls. The whole site appears to be an Iron Age defended settlement (but not a fort as it is not in a good defensive position being overlooked by higher ground to the north) with later Romano-British occupation internally, adjacent to the north-east, and externally to the north-east. NT 966163. Fragmentary, yet distinctive walled trackways have been recorded near the Romano-British settlements at Greaves Ash.		
<b>Catalogue No.</b> 4	<b>SMR No.</b> 1257	<b>Period</b> POST MEDIEVAL
<b>Site Name</b> Hartside	<b>Listing/scheduling</b> None	<b>Type</b> Deserted Settlement
<b>Description</b> 'NT 975162' Deserted medieval village at Hartside. (Nothing visible on available aerial photographs (RAF 1946)).		
<b>Catalogue No.</b> 5	<b>SMR No.</b> 1258	<b>Period</b> UNKNOWN
<b>Site Name</b> Hollow way	<b>Listing/scheduling</b> Scheduled Monument	<b>Type</b> Hollow Way
<b>Description</b> This is a hollow way 5m to 8m wide with a maximum depth of 2.5m. It is traceable for approximately 200m and at its higher north-west end forks into two, just before dying-out in the moorland. There is no evidence to date this track, which is similar to many others in the moorland region.		

<b>Catalogue No.</b> 6	<b>SMR No.</b> 1259	<b>Period</b> ROMAN
<b>Site Name</b> Unenclosed Settlement	<b>Listing/scheduling</b> Scheduled Monument	<b>Type</b> Settlement

**Description**

Unenclosed settlement, two prehistoric settlements and enclosure, field system and cairnfield on Ritto Hill north west of Linhope, part of Scheduled Monument 32769. This part of the monument includes the known extent of the upstanding and buried remains of an unenclosed hut circle settlement, an irregular aggregate field system and cairnfield of later prehistoric date, two settlements and an enclosure of late prehistoric/Romano-British date, situated on the north east facing slopes of Ritto Hill.

<b>Catalogue No.</b> 7	<b>SMR No.</b> 1264	<b>Period</b> BRONZE AGE
<b>Site Name</b> Round cairn	<b>Listing/scheduling</b> Scheduled Monument	<b>Type</b> Cairn

**Description**

NT 9890 1580 A cairn 0.8m diameter, 0.5m high, with deep hollow in centre. No trace of ditch or retaining circle. Discovered during field investigation. The presence of a round cairn on the perimeter of a native settlement is not unprecedented in the area, but it seems more likely in this case to be an associated spoil heap.

<b>Catalogue No.</b> 9, 10	<b>SMR No.</b> 1269	<b>Period</b> MEDIEVAL
<b>Site Name</b> Settlement south of Hare Law	<b>Listing/scheduling</b> Scheduled Monument	<b>Type</b> Deserted Settlement

**Description**

Cluster of stone houses and garths at NT 986176 with extensive ridge and furrow to the south. The houses measure c.12m-15m by 4m-5m with garths c.17m wide by 25m long. Possible corn drying kiln at east end of village. Ridge and furrow delimited by a bank on the north edge. Some rig very broad (12m-14m). Possible post-medieval structures to the north at NT 986176.

<b>Catalogue No.</b> 11	<b>SMR No.</b> 1270	<b>Period</b> UNKNOWN
<b>Site Name</b> Field clearance cairns	<b>Listing/scheduling</b> None	<b>Type</b> Clearance Cairn

**Description**

Viewed in slanting sunlight, the dividing banks of an area of former cultivation are clearly visible between the cairns suggesting that they are stone clearance heaps. On a slight natural knoll to the east (at approximately NU 00071560) however, there is a larger, more consolidated cairn, 9m in diameter and 0.7m high, robbed at the centre, which may be sepulchral.

<b>Catalogue No.</b> 12	<b>SMR No.</b> 1271	<b>Period</b> POST MEDIEVAL
----------------------------	------------------------	--------------------------------

<b>Site Name</b> Field clearance cairns	<b>Listing/scheduling</b> None	<b>Type</b> Clearance Cairn
--	-----------------------------------	--------------------------------

**Description**

The three groups of cairns, one of which includes Aitchison's 'burial mound', are undoubtedly stone clearance heaps. They form part of a widespread pattern of medieval and later cultivation consisting of rig and furrow and fields associated with the adjacent complex of rectangular steadings and garths.

<b>Catalogue No.</b> 13	<b>SMR No.</b> 1274	<b>Period</b> ROMAN
----------------------------	------------------------	------------------------

<b>Site Name</b> Romano-British homestead	<b>Listing/scheduling</b> None	<b>Type</b> Enclosed Settlement
--	-----------------------------------	------------------------------------

**Description**

NT 9776 1530 A badly mutilated earthwork situated on a very slight southern slope about 790 feet above sea level. It contains a good view of the Breamish valley to the south but is overlooked on the other sides. The remains appear to be those of a small oval enclosure bounded by a bank of earth and stones. No trace remains of an entrance. The interior contains a small fragment of curved bank, possibly the remains of a hut circle. The earthwork is too fragmentary for any definite conclusion to be drawn but it may be the remains of a homestead similar to another some 400m to the north-east. The nearest water supply is the River Breamish to the south. Site discovered during field investigation.

<b>Catalogue No.</b> 14	<b>SMR No.</b> 1280	<b>Period</b> ROMAN
----------------------------	------------------------	------------------------

<b>Site Name</b> Hartside Hill Romano-British enclosed settlement	<b>Listing/scheduling</b> None	<b>Type</b> Enclosed Settlement
--	-----------------------------------	------------------------------------

**Description**

A typical enclosed homestead, one unit in the extensive native settlement of Hartside Hill.

<b>Catalogue No.</b> 15	<b>SMR No.</b> 1281	<b>Period</b> ROMAN
----------------------------	------------------------	------------------------

<b>Site Name</b> Ancient settlement on Hartside Hill	<b>Listing/scheduling</b> Scheduled Monument	<b>Type</b> Settlement
---	---	---------------------------

**Description**

Remains of a single-ramparted oval enclosure are situated upon the south-east slopes of a pasture-covered hill, at approximately 920 feet above sea-level.

<b>Catalogue No.</b> 16	<b>SMR No.</b> 1282	<b>Period</b> IRON AGE
<b>Site Name</b> Brough Law multivallate hillfort	<b>Listing/scheduling</b> Scheduled Monument	<b>Type</b> Hillfort
<b>Description</b> A well-preserved hillfort with the remains of stone-founded huts confirming secondary occupation. Published survey (25 inch) revised. The bank with outer ditch in the depression to the south of the fort to which F1 refers, is weak and unlikely to be an additional defence. In fact, the bank appears to be no more than upcast from the ditch, which may have been a hollow way from lower ground, or alternatively a drainage channel from the marshy area to the south-west.		
<b>Catalogue No.</b> 17	<b>SMR No.</b> 1285	<b>Period</b> ROMAN
<b>Site Name</b> Ancient settlements on Hartside Hill	<b>Listing/scheduling</b> None	<b>Type</b> Enclosures
<b>Description</b> Centred NT 990164. Remains of a group of steadings lie upon a gentle south-east moorland pasture slope above the confluence of two burns, at approximately 550 feet above sea-level. Also remains of two enclosures.		
<b>Catalogue No.</b> 18	<b>SMR No.</b> 1286	<b>Period</b> UNKNOWN
<b>Site Name</b> Four mounds, probably natural	<b>Listing/scheduling</b> None	<b>Type</b> Barrow
<b>Description</b> A group of four grass-covered tumuli are situated on a slight rise of ground in open moorland on a gentle south-east slope. The mounds are situated on an irregular-shaped platform of peat, and appear to be no more than natural hummocks.		
<b>Catalogue No.</b> 19	<b>SMR No.</b> 1287	<b>Period</b> ROMAN
<b>Site Name</b> Ancient Settlements on Hartside Hill	<b>Listing/scheduling</b> Scheduled Monument	<b>Type</b> Enclosed Settlement
<b>Description</b> Two homesteads, one with two hut circles in it, a deeply-scooped court attached to one of the homesteads. West Hartside Hill. Irregular earthwork approximately 3/4 acre in area.		
<b>Catalogue No.</b> 20	<b>SMR No.</b> 1288	<b>Period</b> ROMAN
<b>Site Name</b> Ancient Settlements on Hartside Hill	<b>Listing/scheduling</b> Scheduled Monument	<b>Type</b> Settlements
<b>Description</b> Remains of six enclosures are situated, at approximately 830 feet above sea-level, on a gentle south-west moorland pasture slope, upon the broad back of an east-west ridge, which rises to a hilltop at each extremity. The sites overlook the valley of the River Breamish to the south, while to the north, the ground rises a few feet before descending steeply to the valley of the Greensidehill Burn, which is the nearest present fresh water supply.		

<b>Catalogue No.</b> 21	<b>SMR No.</b> 1289	<b>Period</b> ROMAN
<b>Site Name</b> Romano-British settlement on Hartside Hill	<b>Listing/scheduling</b> None	<b>Type</b> Enclosed Settlement
<b>Description</b> Remains of a badly robbed and much mutilated sub-rectangular enclosure situated on a gentle south-east slope of moorland pasture, at approximately 810 feet above sea-level. The site lies on an east-west ridge and overlooks the valley of the River Breamish to the south. Higher ground lies to the west and north.		
<b>Catalogue No.</b> 22	<b>SMR No.</b> 1290	<b>Period</b> ROMAN
<b>Site Name</b> Ancient Settlements on Hartside Hill	<b>Listing/scheduling</b> Scheduled Monument	<b>Type</b> Enclosure
<b>Description</b> A well defined 'scooped' enclosure with hut circles representing a single homestead unit of the extensive native settlement of Hartside Hill.		
<b>Catalogue No.</b> 23	<b>SMR No.</b> 1291	<b>Period</b> POST MEDIEVAL
<b>Site Name</b> Ancient settlements on Hartside Hill	<b>Listing/scheduling</b> Scheduled Monument	<b>Type</b> Enclosure
<b>Description</b> A large complex of round stone-founded huts and enclosures representing an extension of the native enclosed settlement to the immediate west. Some of the enclosures may be later garths contemporary with a number of intrusive rectangular building foundations, and the area of rig and furrow, and extensive field system that develops to the north and west.		
<b>Catalogue No.</b> 24	<b>SMR No.</b> 1293	<b>Period</b> BRONZE AGE
<b>Site Name</b> Hunt Law round barrow	<b>Listing/scheduling</b> Scheduled Monument	<b>Type</b> Round Barrow
<b>Description</b> A cairn of loose stones, with large boulders around the core, is situated upon a gentle south-east slope of moorland pasture, at approximately 720 feet above sea level, above steep south slopes to the valley of the Greensidehill Burn and a few feet below the summit of Hunt Law to the north-west. This mound is almost certainly not sepulchral. It is more likely to be a result of stone clearance.		
<b>Catalogue No.</b> 25,26	<b>SMR No.</b> 1294	<b>Period</b> BRONZE AGE
<b>Site Name</b> Barrows 1000ft (300m) to north of Hunt Law round barrow	<b>Listing/scheduling</b> Scheduled Monument	<b>Type</b> Round Cairn
<b>Description</b> Two round cairns of large loose stones are situated upon a knoll on the highest part of a hill in open moorland pasture at approximately 820 feet above sea-level.		

<b>Catalogue No.</b> 27	<b>SMR No.</b> 1296	<b>Period</b> MEDIEVAL
<b>Site Name</b> Medieval silver cross	<b>Listing/scheduling</b> None	<b>Type</b> Cross
<b>Description</b> A silver cross found on the low land near Greaves Ash. It has in letters of the 13th or 14th centuries, the common charm against wounds and fire 'AGLA' made up of the initials of the four Hebrew words signifying 'Thou art strong in the eternal God'. Exhibited to the Society of Antiquaries, Newcastle by the Duke of Northumberland on 6th January 1864. Sent to him by the Rev Mr Parker.		
<b>Catalogue No.</b> 28	<b>SMR No.</b> 1297	<b>Period</b> MEDIEVAL
<b>Site Name</b> Field clearance cairns	<b>Listing/scheduling</b> None	<b>Type</b> Clearance Cairns
<b>Description</b> The 'cairn cemetery' is undoubtedly the result of stone clearance. It forms part of a widespread pattern of medieval and later cultivation consisting of rig and furrow and fields associated with a large nearby complex of rectangular steadings and enclosures. The isolated cairn is larger and may be sepulchral.		
<b>Catalogue No.</b> 29	<b>SMR No.</b> 1298	<b>Period</b> MEDIEVAL
<b>Site Name</b> Field clearance cairns	<b>Listing/scheduling</b> None	<b>Type</b> Clearance Cairns
<b>Description</b> The cairns fall at the northern edge of an area of cultivation (part of an extensive medieval and later pattern) from which they are most probably stone clearance. They are unconsolidated and of much smaller proportions than two accepted sepulchral cairns to the north.		
<b>Catalogue No.</b> 30	<b>SMR No.</b> 1299	<b>Period</b> MEDIEVAL
<b>Site Name</b> Hunt Law medieval farmstead and field system	<b>Listing/scheduling</b> None	<b>Type</b> Farmstead
<b>Description</b> NT 9857 1652 Remains of a steading are situated above steep south slopes to the valley of the Greensidehill Burn, in open moorland pasture, at approximately 720 feet above sea-level. It is orientated east to west, and is 18m long and 5m wide. The entrance is in the south side.		
<b>Catalogue No.</b> 31	<b>SMR No.</b> 1300	<b>Period</b> ROMAN
<b>Site Name</b> Romano-British homestead	<b>Listing/scheduling</b> None	<b>Type</b> Enclosed Settlement
<b>Description</b> The fragmentary remains of a single homestead consisting of a semi-circular earth and stone bank with one, possibly two huts situated at NT 97871534. It probably represents a unit in the extensive native settlement of Hartside Hill.		

<b>Catalogue No.</b> 32	<b>SMR No.</b> 1301	<b>Period</b> ROMAN
<b>Site Name</b> Romano-British homestead & field system	<b>Listing/scheduling</b> None	<b>Type</b> Farmstead
<b>Description</b> The whole represents a Romano-British homestead and field system most probably contemporary and part of the Romano-British phase of the settlement 100m to the north-east. The rectangular building suggests later probably medieval re-use of the system.		
<b>Catalogue No.</b> 33	<b>SMR No.</b> 1302	<b>Period</b> BRONZE AGE
<b>Site Name</b> Unenclosed hut circle settlement, field system, cairnfield and cord rig.	<b>Listing/scheduling</b> Scheduled Monument	<b>Type</b> Various
<b>Description</b> Unenclosed hut circle settlement, field system, cairnfield and cord rig cultivation north west of Linhope Spout. The monument includes the known extent of the upstanding and buried remains of an unenclosed hut circle settlement, irregular aggregate field system, cairnfield and cord rig cultivation of Bronze Age and Iron Age date, situated on south facing slopes above the Linhope Burn.

<b>Site Name</b> Later prehistoric/Romano-British settlement	<b>Listing/scheduling</b> Scheduled Monument	<b>Type</b> Settlement
<b>Description</b> A late prehistoric/Romano-British settlement lies on the south east facing slope of Ritto Hill. Although disturbed by modern tree planting, the northern end of this settlement is visible as a slight earthwork. The settlement, which is sub-oval in shape, measures about 18m north to south by 20m east to west within a substantial stone wall.		

## APPENDIX 5: List of Historic Buildings

A summary of buildings described by John Grundy in Ingram Township (*Grundy 1988*), with catalogue numbers referring to the distribution plans included in this volume.

Catalogue No.	Grundy ID	Name:	Date:	Grade:	Materials:	Grid Ref.
	ING 1	Bridge over R. Breamish c. 1 mile east of Greensidehill	c. 1910	III	Pre-cast ferro-concrete. Cast-iron parapet	399660 616660

**Summary:**

An early pre-cast concrete bridge. Built by the Ferro-Concrete Construction Co. of Newcastle, to the Hennebique Patent. Slightly hump-backed bridge of a single span supported by two segmental arches with open spandrels.

**Importance:** Local Importance.

**Present status:** Igm\_MP 049

Catalogue No.	Grundy ID	Name:	Date:	Grade:	Materials:	Grid Ref.
75	ING 3	Church of St. Michael Lychgate.	c. 1920	II	Ashlar base. Oak frame. Scottish slate roof.	399660 616660

**Summary:**

Lychgates are almost always attractive because of the solidity of their materials and their craftsmanlike construction. This one is no exception. It is a beautiful example.

**Importance:** Listed Grade II.

**Present status:** Igm\_MP 021-022

Catalogue No.	Grundy ID	Name:	Date:	Grade:	Materials:	Grid Ref.
77	ING 4	The Vicarage	Early- lateC19	II	Dressed stone. WS roof	401560 616240

**Summary:**

A complex house which was added to on several occasions. The entrance side has a 5-bay early C19 block to the R. It has 12-pane

sashes except for one window enlarged later in the C19. The doorway, with a Victorian surround is in the right bay. To the left of this and behind it are large and later additions. On the garden side is a large, dignified, 4-bay façade with sash windows and rusticated quoins. The west side of the house has a lower 3-bay service wing. Various roofs, hipped and gabled, with large square corniced chimneys. An impressive house, but not great architecture. The stable block has been extensively altered.

**Importance:** Listed Grade II.

**Present status:** Igm\_MP 025-031, 033-034

Catalogue No.	Grundy ID	Name:	Date:	Grade:	Materials:	Grid Ref.
72	ING 2	The church of St. Michael	C11-14. Restored mid C19 and 1879	II*	Dressed stone. WS roof	401910 616300

**Summary:**

Appears Victoran from the outside. Aisles rebuilt 1879 and the chancel about the same time. Even the tower which is sturdy, solid and clearly early was taken down and rebuilt in the C19. The church is nonetheless extremely attractive from the outside. The surprise, however is the interior. It has a primitive entirely unmoulded C11 tower arch and delightful C13 arcades. The arches of the south arcade have little fleurs des lys at the springings. The chancel arch and the E arches of the nave have capitals and responds of more C14 type. The arcades are interrupted by short stretches of solid wall without aisles. In the chancel there is half of a C14 mounment to a priest mounted on the N wall. Octagonal font w/ geometric patterns, dated March 11th 1662. There are 2 very good stained glass windows: 1915 St Michael and St. George; 1934 St Aidan and St Oswald with Roddam hall in the background. The church as a whole has an atmosphere far more intense than the sum of its parts. It still feels like a small medieval building.

**Importance:** Listed Grade II\*.

**Present status:** Igm\_MP 001-023

Catalogue No.	Grundy ID	Name:	Date:	Grade:	Materials:	Grid Ref.
	ING 5	Ingram Farm House	Early C19	IV	Igneous rubble, partly rendered. WS roof	401560 616240

**Summary:**

Standard 2 storey 3 bay centre w/ gabled porch, all rendered, with replaced door and window. Lower, slightly recessed 1 bay wings. Gabled roof with kneelers. One original and one renewed chimney. The garden walls to the S have quadrant screen walls and square gatepiers w/ pyramidal caps.

**Importance:** Attractive but not of particular architectural/historical significance.

**Present status:** Igm\_MP 050

Catalogue No.	Grundy ID	Name:	Date:	Grade:	Materials:	Grid Ref.
	ING 6	Ingram Farmbuildings	1826 and Mid C19	IV	Igneous rubble, SS dressings. WS roof and asbestos roofs.	401560 616240

**Summary:**

A large E plan range w. 2 farmyards. The stock yard to left has now been covered with C20 sheds. There is a long 2-storey rear range of shelter sheds w/ 6 segmental arches and a granary on the 1st floor. 3 projecting ranges of byres, stables etc. On the gable of the centre range a datestone inscribed M.R. MDCCCXXVI. In front of this range, a pair of single storey brick byres, possibly the only pre-Victorian brick within the National Park.

**Importance:** Brick byres perhaps unique within the park.

**Present status:**

Catalogue No.	Grundy ID	Name:	Date:	Grade:	Materials:	Grid Ref.
	ING 7	Ingram Cottage (The Old Sheperd's cottage)	c. 1830	III	Igneous rubble, SS dressings. WS roof	401560 616240

**Summary:**

A single storey row, formerly 4 cottages but now converted into two. Two original 16-pane sashes, the others renewed in similar style, all in alternating block surrounds. Hipped roof w/ 3 stone chimneys. Doors in small outhouses to rear. A well-preserved group w/ contemporary garden walls.

**Importance:** Local Importance.

**Present status:** Igm\_MP 037

	ING 8	Hartside Farmhouse	Early C20	IV	Igneous rubble below, pebbledashed above with SS dressings. WS roof Terracotta ridge tiles	397570 616230

**Summary:**

In a restrained Arts and Crafts style; built for Lord Joicy, c. 1905. There is a recessed porch cut out of the right hand corner with a square pier supporting the wall above; an attractive boarded and battened door. The ground floor windows are 2 and 3 light casements in chamfered alternating-block surrounds. Moulded terracotta string course. One small, finely-detailed 1st floor window w/ wooden cornice over. Gabled roof, steeply pitched w/ projecting eaves and small, battered ridge stack. Rather spoilt by inserted and unsympathetic windows on the gable end.

**Importance:** Attractive but not of particular architectural/historical significance.

**Present status:**

	ING 9	Hartside Farmbuildings	Early C19; poss C18 core	IV	Igneous rubble SS dressings. WS roof w/ stone ridge stacks.	397570 616230

**Summary:**

Large U-plan group, some of it with older boulder plinth. Largely unaltered. To the rear a shelter shed w/ 3 segmental arches. Gabled roofs.

**Importance:** Attractive but not of particular architectural/historical significance.

**Present status:**

Catalogue No.	Grundy ID	Name:	Date:	Grade:	Materials:	Grid Ref.
	ING 10	Linhope Farm	Mid C19	III	Igneous rubble SS dressings. WS roofs and Scottish slate roofs	396340 616110

**Summary:**

House, byre and stable in one range. Two sections. The higher right 2 bays have a boarded door and sash windows in alternating block surrounds Gabled roof with one stone and one renewed brick chimney. The lower left section has 2 bays of the house to the R w/ sash windows; those on the 1st floor in gabled half dormers. Byre and stables to L. Fine rubble garden walls and small Dutch barn to the rear, all of the same date. Very unspoilt and picturesque in a beautiful setting.

**Importance:** Local Importance.

**Present status:**

Catalogue No.	Grundy ID	Name:	Date:	Grade:	Materials:	Grid Ref.
	ING 11	Linhope Lodge	1905	III	Lower parts of walls igneous rock w/ SS dressings; upper parts pebbledashed with SS dressings. WS roof w/ terracotta ridge tiles.	396340 616110

**Summary:**

Built for Lord Joicey of Ford Castle, but is now a private rest home. Single-storey, bungalow style as if it were in the Himalayas in British India. It has a narrow 3 -bay centre w/ long projecting wings and a kitchen wing projecting to the rear. In the centre a flight of stone steps up to the very beautiful wood porch; it has screens of sturdy turned columns on each side and a gabled roof w/ shaped bargeboards; built-in benches w/ elaborately shaped ends. The windows are plain casements. The ends of the wings have canted bay windows - that to the R is infact an oriel on an elaborately moulded corbel. Hipped roofs with fine, large, battered chimneys; and 3 lead ventilators w/ screens of columns and pagoda roofs. To the rear a number of small interesting specialized buildings, a wooden game larder, a store keeper's cottage and a kennel, built of concrete. Beautiful setting.

**Importance:** Local Importance.

**Present status:**

Catalogue No.	Grundy ID	Name:	Date:	Grade:	Materials:	Grid Ref.
	ING 12	High Linhope Cottage	Late C19	IV	Rendered. WS roof.	396340 616110

**Summary:**

3 bays, 1 and a half storeys. Gabled porch w/ a central door. 4-pane yorkshire sashes. Large dormer windows w/ bargeboards. Beautiful setting.

**Importance:** Attractive but not of particular architectural/historical significance.

**Present status:**
